

ADVANTAGES

- Incinerable bags
- High dust holding capacity = long life
- Recommended choice for gas turbine pre-filtration
- Hybrid Technology media
- Maximum surface use
- High mechanical strength

The Cam-Flo Hybrid is a new generation of premium bag filters for gas turbines that utilize the breakthrough Hybrid media technology to combine glass fiber and synthetic fibers. The results is a smart solution for an extended filter life, a stable and predictable performance, and most of all, carefree operations. Self-supporting bags and a unique design make this filter an excellent pre-filter and coalescer choice for turbomachinery applications.
